

Joshua Hasinski

Munroe Falls, OH | (330) 888-3715 | joshhasinski@gmail.com | [Portfolio](#)

Summary

A meticulous and analytical Systems Architect with three years of intensive, self-directed experience designing and documenting complex, rule-based conceptual systems from the ground up. Authored a comprehensive technical library of over 5 million words for a multi-year architectural project, demonstrating expert-level proficiency in data taxonomy, hierarchical logic, and root cause analysis. Proven ability to establish foundational frameworks and perform continuous quality assurance to ensure long-term system viability and internal consistency.

Core Competencies

- **Systems Architecture:** Rule-Based System Design, Data Taxonomy & Modeling, Conceptual Frameworks, Hierarchical Logic
- **Quality Assurance:** Root Cause Analysis, Data Continuity Analysis, Logical Flaw Detection
- **Technical Documentation:** Comprehensive Rule-Setting, Process Flow Documentation, Technical Writing (5M+ Words)
- **Tools & Technologies:** Microsoft Word, Excel, Python, SQL, GitHub

Relevant Experience

Lead Architect & Documentation Specialist | Project: Chimera Aggregate *Self-Directed Research & Development Project* | June 2022 – Present

- Architected and documented a comprehensive, rule-based conceptual framework from inception, culminating in over 5 million words of meticulous technical documentation that establishes the core theoretical and procedural rule-sets.
- Designed and implemented a complete data taxonomy and hierarchical logic model, defining all system entities and their interactions to ensure system-wide internal consistency and prevent data continuity conflicts.
- Executed a continuous quality assurance protocol on thousands of conceptual models, performing deep root cause analysis to identify, track, and resolve thousands of foundational logical flaws.
- Authored the complete library of system architecture, process flows, and foundational rule-sets, creating a single source of truth for a complex, multi-stage life cycle system.
- Developed and modeled intricate procedural generation logic and life cycle simulations to validate long-term system stability, resource allocation, and stress adaptation.

Employment History

Lead Customer Service Representative | Circle K | Munroe Falls, OH | Oct 2024 - May 2025

Grill Team Member | Wendy's | Stow, OH | Oct 2023 - January 2024

Team Member | Sheetz | Cuyahoga Falls, OH | Feb 2022 - Aug 2022

Education

High School Diploma | Stow Munroe Falls High School | Stow, OH | Graduated May 2021
